**DETAILED ACTION**

In response to After-Final Amendment filed August 25, 2005

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Amir Behnia on September 13, 2005.

The application has been amended as follows:

- a. Please replace claim 11 as follows :

11. A plumb bob bracket, comprising:

a first leg having a first panel and a second panel attached to said first panel along common edge and defining a space therebetween;

a second leg having a first panel and a second panel attached to said first panel along a common edge and defining a space therebetween;

said first leg having a first end, said second leg having a first end, wherein said first leg first end is attached to said second leg first end at an angle;

a bar member having a first end aligned and attached to said first panel of said first leg and a second end aligned and attached to said first panel of said second leg;

a string having a first end and a second end, said second end is attached to said bar member of said plumb bob bracket, and a plumb bob is attached to said first end;

wherein said plumb bob bracket is removably attached to adjoining first and second beams of a stud wall in a manner that said first beam is positioned within said space between said first and second panels of said first leg, and said second beam is positioned within said first and second panels of said second leg, and said bar member remains a substantially horizontal position.

b. Please replace claim 18 as follows :

18. In combination with a first stud wall and a second stud wall each having an upper beam, a lower beam, and a plurality of vertical beams therebetween, a plumb bob bracket, comprising:

a first leg having a first panel and a second panel attached to said first panel along a common edge and defining a space therebetween;

a second leg having a first panel and a second panel attached said first panel along a common edge and defining a space therebetween;

said first leg having a first end, said second leg having a first end, wherein said first leg first end is attached to said second leg first end at an angle;

a bar member having a first end aligned and attached to said first panel of said first leg and a second end aligned and attached to said first panel of said second leg;

wherein said plumb bob bracket is attached to said first stud wall upper beam in a manner that said first stud wall upper beam is positioned within said space between said first and second panels of said first leg, and said second stud wall upper beam with said first and second panels of said second leg.
